 Browse on Web

The NEXCONEC® fiber management splice kit is an essential item for maintaining fiber in the correct manner. Designed for professional use, this kit includes essential components such as a self-adhesive splice bridge, a warning label, 8x self-adhesive bunny clips, and a PG 13.5 cable gland.

These components work together seamlessly to provide a high level of cable management, ensuring that fiber connections are secure and protected from any potential damage. This kit not only guarantees the proper organization of fiber cables but also reflects a commitment to maintaining a reliable and efficient network infrastructure.
